The First naury is distributing the silver enange, whos for that institution anything tuappliments from our money people. It is supposed that the slow rate at which eliver is sent out is owing either to a scarcity of quantity or to the delay caused by the counting of the fractional currency for which it is exchanged. As takes no more time to count this curency when exchanged for large notes than for stiver, the receipt of one-half the former in a five-thousand lot, where all silver was applied for, leads to the bellef tout a scarcity of silver coin is the cause of the difficulty. This being the cure, those who get held of any of it Reep it, and consequently there is no more allver regularly circulating from hand to hand in Memphis than there was a month age. The vice president of the Manhattan bank having left the oily for some months, Edward Goldsmith, F.q., discharges the duties in the meantime. He is a competent and annable gentleman, and the bank will toes nothing of its excellent reputation while under his management. New York Bulletin, of Monday, has the sllowing: "The scarcity of small countrie increases, and the premium on translowal notes and subsidiary silver coins varied from two to five per cent. Small store keep rs, restaurant keepers and others having much to do with small change are becoming load in their denunciation of the whole bustnets, and are indiscriminately abusing every one connected with the treasury. The same paper says: "We enter upon the last of the spring months with rather more activity in mercantile circles here, and a brisker trade movement as regards the country at large, than has been visible at any time heretof re during the spring. Our advices from the west and southwest are to the effect that the country roads are now drying up rapidly, and that the movecountry produce and cattle has been materially quickened. Money is more active at Chleago, St. Louis and other trade enters -the banks of the latter city being largely drawn upon within the low mays past on Texas account to faciltale the cattle movement, which is c ming every year to be more and more important f-sture of domestic trade We notice also considerable shipments of train from New Orleans to foreign ports, involving the rise of money on bills. All these are healthy indications, and we may add to them the favorable progress of farming operations and the rest movement of produce toward the reaboard under charger freights."
